METROPOLITAN AREA EMPLOYMENT AND UNEMPLOYMENT: AUGUST 2005

Unemployment rates were lower in August than a year earlier in 267 of the 367 metropolitan areas, higher in 81 areas, and unchanged in 19 areas, the Bureau of Labor Statistics of the U.S. Department of Labor reported today. Thirteen metropolitan areas registered jobless rates below 3.0 percent, and two areas recorded rates of more than 10.0 percent. The national unemployment rate was 4.9 percent, not seasonally adjusted, down from 5.4 percent a year earlier.

Metropolitan Area Unemployment (Not Seasonally Adjusted)

In August, 84 metropolitan areas registered unemployment rates below 4.0 percent, up from 47 areas a year earlier, while 21 areas reported unemployment rates of at least 7.0 percent, down from 40 areas a year earlier. Bismarck, N.D., and Fargo, N.D.-Minn., recorded the lowest unemployment rates in August 2005, 2.5 percent each. The next lowest rates were in Honolulu, Hawaii, and Idaho Falls, Idaho, 2.6 percent each. The highest unemployment rates again were recorded in Yuma, Ariz., 19.2 percent, and El Centro, Calif., 18.0 percent. These two adjacent areas have highly seasonal agricultural employment. Overall, 195 metropolitan areas registered unemployment rates below the U.S. rate of 4.9 percent, 151 areas had higher rates, and 21 areas had the same rate. (See table 1 and the map.)

The largest over-the-year jobless rate decreases for August were posted in three Alabama areas—Gadsden (-2.5 percentage points), Mobile (-2.4 points), and Florence-Muscle Shoals (-2.1 points). Vero Beach, Fla., also reported a rate decline of 2.1 percentage points. Fifty-three additional areas recorded rate decreases of at least 1.0 percentage point. New Orleans-Metairie-Kenner, La., experienced the largest over-the-year jobless rate increase in August (+1.3 percentage points). (This was for the period before Hurricane Katrina struck the area.) No other metropolitan area had an over-the-year unemployment rate increase as large as 1.0 percentage point.

Of the 49 metropolitan areas with a Census 2000 population of 1 million or more, Minneapolis-St. Paul-Bloomington, Minn.-Wis., reported the lowest unemployment rate in August, 3.3 percent. The next lowest

Hurricane Katrina

Hurricane Katrina struck Florida and the Gulf Coast after the August survey reference period and therefore did not affect the August employment and unemployment estimates presented in this release.

rates were posted in Orlando, Fla., and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., 3.5 percent each. The highest jobless rate among the large areas again was recorded in Detroit-Warren-Livonia, Mich., 7.0 percent, followed by Memphis, Tenn.-Miss.-Ark., 6.4 percent, and Portland-Vancouver-Beaverton, Ore.-Wash., 6.2 percent. Thirty-seven large areas had lower unemployment rates than a year earlier, nine registered higher rates, and three had no change. The largest over-the-year jobless rate decreases were posted in Birmingham-Hoover, Ala., and St. Louis, Mo.-Ill. (-1.4 percentage points each), and Kansas City, Mo.-Kan., and Los Angeles-Long Beach-Santa Ana, Calif. (-1.3 points each). Six additional large areas had rate declines of at least 1.0 percentage point. The largest over-the-year rate increase was reported in New Orleans-Metairie-Kenner, La. (+1.3 percentage points), followed by Hartford-West Hartford-East Hartford, Conn. (+0.5 percentage point).

Metropolitan Division Unemployment (Not Seasonally Adjusted)

Eleven of the most populous metropolitan areas are composed of 34 metropolitan divisions, which are essentially separately identifiable employment centers. The Bethesda-Frederick-Gaithersburg, Md., division posted the lowest unemployment rate in August, 3.2 percent. The next lowest division rate, 3.4 percent, was recorded in Framingham, Mass. Seven additional divisions registered jobless rates below 4.0 percent. The highest unemployment rate among the 34 metropolitan divisions continued to be reported in Detroit-Livonia-Dearborn, Mich., 8.8 percent. Lawrence-Methuen-Salem, Mass.-N.H., at 6.7 percent, and Tacoma, Wash., at 6.3 percent, had the next highest rates. (See table 2.)

Over the year, August jobless rates were lower in 33 of the 34 metropolitan divisions and higher in 1 division. Unemployment rates decreased by 1.0 percentage point or more in eight of the metropolitan divisions. The largest decreases were in Los Angeles-Long Beach-Glendale, Calif. (-1.6 percentage points), and Lawrence-Methuen-Salem, Mass.-N.H. (-1.4 points).

For 8 of the 11 metropolitan areas that contain divisions, the ranges between the highest and lowest division unemployment rates were 1.0 percentage point or more. The metropolitan areas that had the widest rate ranges among their divisions were Boston-Cambridge-Quincy, Mass.-N.H. (Lawrence-Methuen-Salem, Mass.-N.H., 6.7 percent, compared with Framingham, Mass., 3.4 percent), and Detroit-Warren-Livonia, Mich. (Detroit-Livonia-Dearborn, 8.8 percent, compared with Warren-Farmington Hills-Troy, 5.8 percent).

Metropolitan Area Nonfarm Employment (Not Seasonally Adjusted)

In August 2005, 305 metropolitan areas recorded over-the-year increases in nonfarm payroll employment, 52 reported decreases, and 10 had no change. The largest over-the-year employment gains were posted in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+84,500), Miami-Fort Lauderdale-Miami Beach, Fla. (+80,000), New York-Northern New Jersey-Long Island, N.Y.-N.J.-Pa. (+74,800), Phoenix-Mesa-Scottsdale, Ariz. (+71,600), Las Vegas-Paradise, Nev. (+62,100), and Los Angeles-Long Beach-Santa Ana, Calif. (+60,000). The largest percentage increases in employment were reported in Yuma, Ariz. (+8.8 percent), Coeur d'Alene, Idaho (+8.1 percent), St. George, Utah (+7.7 percent), Las Vegas-Paradise, Nev. (+7.6 percent), and El Centro, Calif. (+7.0 percent). Detroit-Warren-Livonia, Mich., experienced the largest over-the-year employment decline (-21,900), followed by Dayton, Ohio (-4,800), Rochester, N.Y. (-4,600), Youngstown-Warren-Boardman, Ohio-Pa. (-4,300), Holland-Grand Haven, Mich. (-3,500), and Cleveland-Elyria-Mentor, Ohio (-3,300). The largest over-the-year percentage declines in employment were posted in Danville, Va. (-3.3 percent), Holland-Grand Haven, Mich. (-3.1 percent), Monroe, Mich. (-2.9 percent), Bay City, Mich. (-2.7 percent), Sheboygan, Wis. (-2.0 percent), and Flint, Mich. (-1.9 percent).

Over the year, nonfarm employment rose in 32 of the 35 metropolitan areas with annual average employment levels above 750,000 in 2004. The largest over-the-year percentage increases in employment in these large metropolitan areas occurred in Las Vegas-Paradise, Nev. (+7.6 percent), Orlando, Fla. (+4.7 percent), Phoenix-Mesa-Scottsdale, Ariz. (+4.3 percent), Miami-Fort Lauderdale-Miami Beach, Fla. (+3.5 percent), Seattle-Tacoma-Bellevue, Wash. (+3.2 percent), Charlotte-Gastonia-Concord, N.C.-S.C. (+3.1 percent), and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+3.0 percent). Of the largest 35 metropolitan areas, only Detroit-Warren-Livonia, Mich. (-1.1 percent), and Cleveland-Elyria-Mentor, Ohio, and San Jose-Sunnyvale-Santa Clara, Calif. (-0.3 percent each), reported over-the-year percentage decreases in employment.

Metropolitan Division Nonfarm Employment (Not Seasonally Adjusted)

Nonfarm payroll employment data were available in August 2005 for 32 metropolitan divisions, which are essentially separately identifiable employment centers within a metropolitan area. Twenty-nine of the 32 metropolitan divisions reported over-the-year employment increases, while 3 reported decreases. The largest increase over the year in the metropolitan divisions occurred in Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+71,800), followed by New York-Wayne-White Plains, N.Y.-N.J. (+55,800), Seattle-Bellevue-Everett, Wash. (+43,500), and Los Angeles-Long Beach-Glendale, Calif. (+35,000). Over-the-year employment losses were recorded in Detroit-Livonia-Dearborn, Mich. (-11,000), Warren-Farmington Hills-Troy, Mich. (-10,900), and Newark-Union, N.J.-Pa. (-5,700).

The largest over-the-year percentage increases in employment among the metropolitan divisions were reported in Fort Lauderdale-Pompano Beach-Deerfield Beach, Fla. (+4.7 percent), Seattle-Bellevue-Everett, Wash., and West Palm Beach-Boca Raton-Boynton Beach, Fla. (+3.2 percent each), and Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va. (+3.1 percent). Over-the-year percentage decreases in employment among the divisions were reported in Detroit-Livonia-Dearborn, Mich. (-1.3 percent), Warren-Farmington Hills-Troy, Mich. (-0.9 percent), and Newark-Union, N.J.-Pa. (-0.6 percent).

The Regional and State Employment and Unemployment release for September is scheduled to be issued on October 21. The Metropolitan Area Employment and Unemployment release for September is scheduled to be issued on November 2.

Technical Note

This release presents labor force and unemployment data from the Local Area Unemployment Statistics (LAUS) program (tables 1 and 2) for 375 metropolitan statistical areas and metropolitan New England City and Town Areas (NECTAs), including those in Puerto Rico. Estimates for over 30 metropolitan and NECTA divisions also are presented. Nonfarm payroll employment estimates from the Current Employment Statistics (CES) program (tables 3 and 4) are provided for the same areas. State estimates were previously published in the news release, *Regional and State Employment and Unemployment*, and are republished in this release for ease of reference. The LAUS and CES programs are both federal-state cooperative endeavors.

Labor force and unemployment—from the LAUS program

Definitions. The labor force and unemployment data are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The labor force includes both the employed and the unemployed. Employed persons are those who did any work at all for pay or profit in the survey reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who have a job from which they were temporarily absent, whether or not paid, for such reasons as labor-management dispute, illness, or vacation. Unemployed persons are those who did not work at all (in the reference week), have actively looked for a job (sometime in the 4-week period ending with the survey reference week), and are currently available for work; persons on layoff expecting recall need not be looking for work to be counted as unemployed.

Method of estimation. Effective January 2005, estimates for all census divisions, states, the District of Columbia, the Los Angeles-Long-Beach-Glendale metropolitan division, and New York City were produced using updated time-series models with real-time benchmarking. Model-based estimation was extended to the following areas and respective balances-of-state: Chicago-Naperville-Joliet, IL Metropolitan Division; Cleveland-Elyria-Mentor, OH Metropolitan Statistical Area; Detroit-Warren-Livonia, MI Metropolitan Statistical Area; Miami-Miami-Beach-Kendall, FL Metropolitan Division; New Orleans-Mataire-Kenner, LA Metropolitan Statistical Area; and Seattle-Bellevue-Everett, WA Metropolitan Division. This will improve the statistical basis of the estimation for these areas and provide important tools for analysis, such as measures of errors and seasonally adjusted series. For all other substate areas, estimates are prepared through indirect estimation procedures. Employment estimates, which are based largely on “place of work” estimates from the CES program, are adjusted to refer to place of residence as used in the CPS. Unemployment estimates are aggregates of persons previously employed in industries covered by state unemployment (UI) laws and entrants to the labor force data from the CPS. The substate estimates of employment and unemployment, which geographically exhaust the entire state, are adjusted proportionally to ensure that they add to the independently estimated state or balance-of-state totals. A detailed description of the estimation procedures is available from BLS upon request.

Annual revisions. Labor force and unemployment data shown for the prior year reflect adjustments made at the end of each year, usually implemented with January estimates. The adjusted estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation at the state and selected area level. All substate estimates are adjusted to add to the revised model-based estimates.

Employment—from the CES program

Definitions. Employment data refer to persons on establishment payrolls who receive pay for any part of the pay period which includes the 12th of the month. Persons are counted at their place of work rather than at their place of residence; those appearing on more than one payroll are counted on each payroll. Industries are classified on the basis of their principal activity in accordance with the 2002 version of the North American Industry Classification System.

Method of estimation. The employment data are estimated using a “link relative” technique in which a ratio (link relative) of current-month employment to that of the previous month is computed from a sample of establishments reporting for both months. The estimates of employment for the current month are obtained by multiplying the estimates for the previous month by these ratios. Small-domain models are used as the official estimators for the approximately 10 percent of CES published series which have insufficient sample for direct sample-based estimates.

Annual revisions. Employment estimates are adjusted annually to a complete count of jobs, called benchmarks, derived principally from tax reports which are submitted by employers who are covered under state unemployment insurance (UI) laws. The benchmark information is used to adjust the monthly estimates between the new benchmark and the preceding one and also to establish the level of employment for the new benchmark month. Thus, the benchmarking process establishes the level of employment, and the sample is used to measure the month-to-month changes in the level for the subsequent months.

Reliability of the estimates

The estimates presented in this release are based on sample survey and administrative data and thus are subject to sampling and other types of errors. Sampling error is a measure of sampling variability—that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data are also subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the special estimation processes used. The sums of individual items may not always equal the totals shown in the same tables because of rounding. With respect to the LAUS program, unemployment rates are computed from unrounded data rather than from data that may be displayed in the tables; differences, however, are generally insignificant.

Labor force and unemployment estimates. Model-based error measures, including for over-the-month change, are available for states on the BLS Web site at <http://www.bls.gov/lau/lastderr.htm>. Measures of nonsampling error are not available, but additional information on the subject is provided in the BLS monthly periodical, *Employment and Earnings*.

Employment estimates. Measures of sampling error for state CES data at the supersector level and for metropolitan area CES data at the total nonfarm level are available on the BLS Web site at <http://www.bls.gov/sae/790stderr.htm>. Information on recent benchmark revisions for states is available at <http://www.bls.gov/sae>.

Area definitions

The substate area data published in this release reflect the standards and definitions established by the U.S. Office of Management and Budget on February 18, 2004. A detailed list of the geographic definitions is available on the Web at <http://www.bls.gov/lau/lausmsa.htm> and also is published annually in the May issue of *Employment and Earnings*.

Additional information

More complete information on the technical procedures used to develop these estimates and additional data appear in *Employment and Earnings*, which is available by subscription from the Super-

intendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (telephone 202-512-1800).

Estimates of unadjusted and seasonally adjusted labor force and unemployment data for states, census regions and divisions, and eight areas are available in the news release, *Regional and State Employment and Unemployment*. Estimates of labor force and unemployment for all states, metropolitan areas, labor market areas, counties, cities with a population of 25,000 or more, and other areas used in the administration of various federal economic assistance programs are available on the BLS Web site at <http://www.bls.gov/lau>. Employment data from the CES program are available at <http://www.bls.gov/sae/>.

Information in this release will be made available to sensory impaired individuals upon request. Voice phone: 202-691-5200; TDD message referral phone: 1-800-877-8339.

- Data not available.

¹ Area boundaries do not reflect official OMB definitions.

NOTE: Data refer to place of residence. Data for Puerto Rico are derived from a monthly household survey similar to the Current Population Survey. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausmsa.htm> and in the May issue of *Employment and Earnings*. Areas in the six New England states are

Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., and Weirton-Steubenville, W.Va-OHio, are the exceptions in that they are listed under Illinois and Ohio, respectively, for operational reasons. Estimates for the latest month are revised the following month, and at least 3 years of estimates are subject to revision at the end of the year, to incorporate updated inputs and reestimation.

^p = preliminary.

¹ These 11 areas contain all of the 34 metropolitan divisions.

² Part of the area (or division) is in one or more adjacent states.

³ All of the division is in one or more adjacent states.

NOTE: Data refer to place of residence. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausma.htm> and in the May issue of *Employment and Earnings*. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed

under the state that corresponds to the first city in their title. Metropolitan divisions are listed under their metropolitan areas. Some divisions lie in more than one state, and some, like Camden, N.J., are totally outside the states under which their metropolitan areas are listed. Estimates for the latest month are revised the following month, and at least 3 years of estimates are subject to revision at the end of the year, to incorporate updated inputs and reestimation. Two sets of metropolitan areas and divisions have similar or identical titles. For Washington-Arlington-Alexandria, D.C.-Va.-Md.-W.Va., the titles are identical. For the Chicago-Naperville-Joliet, Ill.-Ind.-Wis. metropolitan area, the division title includes only Illinois.

¹ Area boundaries do not reflect official OMB definitions.

^P = preliminary.

NOTE: Data are counts of jobs by place of work. Estimates subsequent to the current benchmark are provisional and will be revised when new information becomes available. Area definitions are based on Office of Management and Budget Bulletin No. 04-03, dated February 18, 2004, and are available at <http://www.bls.gov/lau/lausmsa.htm> and

in the May issue of *Employment and Earnings*. Areas in the six New England states are Metropolitan New England City and Town Areas (NECTAs), while areas in other states are county-based. Some metropolitan areas lie in two or more states. They are listed under the state that appears first in their titles. Davenport-Moline-Rock Island, Iowa-Ill., and Weirton-Steubenville, W. Va.-Ohio, are the exceptions in that they are listed under Illinois and Ohio, respectively, for operational reasons.
